

Dorset Environmental Records Centre

DORSET FLORA RECORDING CARD

Site or Location	Recorder(s)
Habitat	
Grid Reference	Date

The list overleaf shows commonly recorded species in Dorset. For example, the most common ivy found in Dorset is *Hedera hibernica*, if you haven't checked the hairs, use *Hedera hel/hib*. Species which are nationally or locally rare, scarce or threatened may not be included. For these species we would like more detail, including abundance. Please record in the table below. Dorset Notable Species are marked *. The list of Dorset Notable Species and name changes for common species can be found on the DERC website in the Resources Library.

Rare, notable & other species not included overleaf			
Species	Where within site or location	Grid Ref. (8 fig)	Habitat / Population Size

CONSENT TO RELEASE OF RECORDS

Records are sent to DERC on the understanding that the information provided by the recorder/compiler/determiner will be entered onto a computerised database which will be used for nature conservation, research and education and will be available for public information although records for particular sites or species may be restricted. The information remains the intellectual property of the recorder/compiler/determiner at all times.

Please add your data to Living Record www.livingrecord.net or return your form to
